Presidents Message

What is ALAC (American Lhasa Apso Club, Inc.)? It is the parent club for the Lhasa Apso breed of dogs. It is the national club regulating the Lhasa Apso activities for the United States and it is a member club of The American Kennel Club.

According to ALAC's Constitution and By-Laws the object of the Club is:
(a) to encourage and promote the breeding of pure-bred Lhasa Apsos and to do all possible to bring their natural qualities to perfection;
(b) to encourage the organization of independent local Lhasa Apso Specialty Clubs in those localities where there are sufficient fanciers of the breed to meet the requirements of The American Kennel Club;
(c) to urge members and breeders to accept the standard of the breed as approved by The American Kennel Club as the only standard of excellence by which Lhasa Apsos shall be judged;
(d) to do all in its power to protect and advance the interests of the breed and to encourage sportsmanlike competition at the dog shows and obedience trials;
(e) to conduct sanctioned matches, specialty shows and obedience trials under the rules of The American Kennel Club.

ALAC is made up of approximately 500 members who are ALL responsible to help ALAC successfully reach the objectives stated above.

Why are you a member of ALAC? I constantly hear that members do not get anything from ALAC. That means that you do not get anything from
yourself because ALAC is made up of members like yourself. Members like yourself are the officers, board members and committee chairpersons all paying the same dues regardless of how much time and travel expense they contribute in the quest to fulfill ALAC's objectives.

As a member of ALAC you are obligated to contribute to its progress. Here is a list of ways you can fulfill your obligations:

1. COMMITTEES--In the last Bulletin I listed the committees that the ALAC Board appoints each year. The activities of these committees are directly related to the objectives of ALAC. If you feel that you would like to serve on one of these committees, please contact the chairperson and they will welcome the help. If you would like to head one of these committees send a resume and plan of ideas along with your application for the position to me and this information will be presented to the Board for their consideration at the time of selection. It is necessary to send along your plans so that approval can be made on the basis of your qualifications.

2. OFFICERS or BOARD OF DIRECTORS--If you would like to serve in this capacity you must be elected by the membership and when the nominating committee's report is sent out there will be rules on how to become nominated to one of these positions.

3. DONATIONS--From time to time you will receive correspondence from ALAC requesting donations for trophies or advertising in show catalogs. These donations are necessary so that our Specialties are successful. This is a simple way to fulfill your ALAC obligation as it only takes 5 minutes of your time to
write out a check and address an envelope.

4. PARTICIPATE IN ALAC ACTIVITIES--Attend the National Specialty Festivities. Every year we have an Annual Awards Dinner where the yearly awards are presented. (Rules and regulations for obtaining awards will be printed in the Bulletin or sent with correspondence). The annual meeting and election is held with the National Specialty. ALAC sponsors, with the help of the local Specialty Club hosts, four regional Futurities each year. ALAC tries to hold a symposium with the various activities but many fail from lack of participation.

5. ADVERTISEMENT--ALAC has two projects that depend totally on your support in advertisement.
   (a) The ALAC Champion-CD Yearbook is in process of catching up to simply a yearly project but because it is a rather new project we want to make it a complete library so we have to double up on years, however, it is completely dependent on your support. This is also a simple way to fulfill your obligation to ALAC. Just sending a check, photo and pedigree takes very little of your time and you will see your dog in print.
   (b) You are reading the BULLETIN and in order for it to continue to inform you and to improve its format you must support it with your advertisement. Please find included in this BULLETIN a form to complete so that you can send your advertisement and easily fulfill your obligation.

6. PROMOTION--Be objective and find the positive contributions that ALAC makes and promote these things to all Lhasa Apso fanciers. It is always easy to pick out the
negatives but I ask you to do a very difficult thing - a thing that seems to go against human nature - forget the negatives and promote the positives and really SELL the American Lhasa Apso Club. If every member will fulfill only one of the above obligations we will have a club that will not have many negatives.

PLEASE SUPPORT ALAC!!!

FULFILL AN OBLIGATION TODAY!!!

Respectfully submitted,
Carolyn A. Herbel, President
FROZEN SEMEN ACCEPTED BY AKC -- As of March 1981, the American Kennel Club has approved the use of frozen semen in breeding programs. Presently, Dr. Seger, the veterinarian who has been researching the project, has the only AKC approved center for semen collection, located in Texas. Recently, Dr. Fran Smith of the University of Minnesota, has asked for support in starting a collection center at her University. This would be a large advantage to the northern population.

The procedure for the collection would consist of the male being sent to the University for a two week period, in which multiple collections would be taken. The initial cost would be approximately $1,500.00. The semen would be properly labeled and stored for up to ten years. The cost would average out to be $30.00 a breeding. Upon request, the frozen semen is mailed to a licensed veterinarian where the artificial insemination is performed on the bitch.

In order for the University of Minnesota to be approved and open a center in St. Paul, letters need to be sent from breeders showing a heavy interest. Get involved and show some support! Write: Dr. Fran Smith, University of Minnesota Veterinary Clinic, Small Animal Department, St. Paul, Minnesota.

PARVOVIRUS VACCINE -- Parvo virus, first seen in 1978, causes a syndrome of varying symptoms ranging from hemorrhagic diarrhea and vomiting in older pups and dogs to sudden death in four to eight week old puppies.
 Owners are recommended to vaccinate all adults and puppies against the disease. Caution should be taken when deciding upon the type of vaccine to use. The two major types to use are the "Killed" virus vaccine and the "Modified live" virus vaccine. Both types of vaccines are being heavily researched for the general pet population. The dog breeder has specific concerns, such as whether or not the vaccines have been researched properly in conjunction with the reproductive effects of the drug. Because of the initial shocking effects of the virus, owners were grabbing for any kind of protection. The vaccine companies have not had enough time to really know the long term effects. Be Cautious! The killed vaccines have shorter term coverage, but may be safer in the long run. The modified live virus vaccine should never be given during pregnancy. Until time has proven the modified live vaccines to be safe medically and in specific areas, reproductive and so forth, perhaps it is safer to use the killed vaccines. Good coverage has been seen with proper usage.

PYOMETRA TREATMENT -- Very recent studies have been done on the prospect of treating a pyometra instead of resorting to the standard ovariohysterectomy. Used on valuable breeding candidates only, a drug combination of prostoglandins and antibiotics has been used to restore the uterus to proper breeding condition. Although this method is only in experimental stages of canine reproduction at this point, good results are being shown and are indicating a promising breakthrough.

Submitted by,
Janine Charboneau
Dr. Janine J. Charboneau received her Doctor of Veterinary Medicine degree and a Bachelor of Science degree in Animal Science at Michigan State University. A second degree in Zoology was almost completed.

With a heavy interest in clinical canine reproduction, her last fifteen years in dog breeding and bench showing have been invaluable. She has spent the last nine years in Lhasas.

Throughout the year, Dr. Charboneau will keep ALAC members informed on recent medical updates, breakthroughs and theories.
