

Naturally A Service Dog

Rosie (GCH Kiki-Ari Ha-Lee Tequila Rose) saved her owner's life more than once. The now late DeAnna Heller suffered from multiple illnesses including diabetes, lupus, myocitis and heart disease. Rosie slept in DeAnna's room (probably her bed) and was so in tune with DeAnna that several times she was known to have awoken DeAnna by barking and carrying on until she forced DeAnna to get up. It would turn out that DeAnna's blood sugar levels were dangerously low and she could have easily slipped into a diabetic coma. If it were not for Rosie we could have lost DeAnna several years earlier. Our dear friend finally succumbed to her illnesses in 2018. DeAnna had been an ALAC member on and off for many years when she could afford the dues, long time member of The Twin Cities Lhasa Club for nearly 40 years and used the kennel name Kiki-Ari. Rosie now lives with two other ladies and still looks out for her new owners.
